

ABSTRACT OF THE DISCLOSURE

A display control method includes displaying
a plurality of saved files and a plurality of folders
representing categories which classify the plurality
5 of files on a window, causing to select one of the
plurality of displayed folders, and clearing the
plurality of folders and the plurality of files which
are displayed, and displaying a plurality of other
folders as selective candidates in a category
10 represented by a selected folder and the plurality of
files, when one of the plurality of displayed folders
is selected.
